

## Electron Configuration - Class Practice

| Element Name | # of electrons | Electron Configuration |
|--------------|----------------|------------------------|
| Phosphorus   |                |                        |
| Sulfur       |                |                        |
| Bromine      |                |                        |
| Neon         |                |                        |
| Lithium      |                |                        |
| Strontium    |                |                        |
| Aluminum     |                |                        |
| Argon        |                |                        |
| Helium       |                |                        |
| Fluorine     |                |                        |
| Nitrogen     |                |                        |
| Potassium    |                |                        |
| Beryllium    |                |                        |
| Calcium      |                |                        |
| Iodine       |                |                        |
